# Met One Instruments, Inc.

Air Plus Software

Air Plus software includes all of the functions required for the collection, viewing of data, and production of both tabular and graphic reports needed by most users of an air quality or other environmental monitoring system. It is designed for use with the Met One Instruments, Inc. line of data collection products.
Data Download

Data collection can be performed automatically based on the requirements ofthe system. It can be done at a specified averaging interval or on a daily basis. Data can be collected via direct connection, direct radio link or cellular modem.

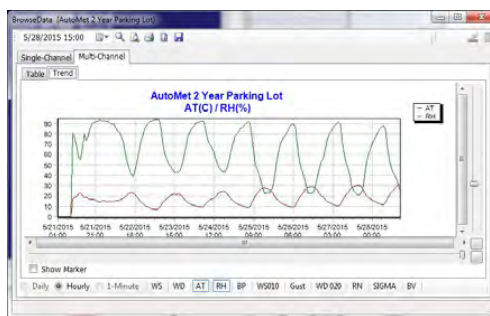

Data History

Air Plus uses a database to save each station's data. Users can then look at each station's data history via tables or charts. Users can even compare two channels with one another using the multi-channel tab.

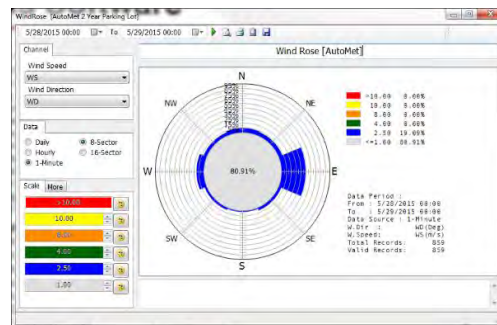

Charts/Graphs

Display all your data graphically using charts/graphs. Look at a single channel or compare multiple channels using the multi-channel tab.

Wind Rose

Display wind speed and wind directional data graphically using Air Plus's built in wind rose plot.

System Requirements:

|	
Disk Space:	60 MB
Operating System:	Win XP, Win Vista, Win 7, Win 8, Win 10
Processor Speed:	1GHz or faster
Memory:	512MB minimum

Notifications

Air Plus allows users to configure 3 different types of notifications: Data Retrieval Failed, New Data Arrival, and Data Conditional notifications. Users can then send these notifications by E-mail, SMS text message, or Twitter. Setup custom messages to send!

Reports / Auto Export

Air Plus allows users to generate reports based on a date range selected. Air Plus can automatically export records to a CSV file.

Easy Set Up

Air Plus is designed for the user to easily access information within a product without having to know underlying communications protocol for that device. Just connect the device to Air Plus and start downloading data!
